(continue) at this pace until the end of the century, scientist ..... (warn). Their research ..... (show) that the loss of so much ice ..... (trigger) dramatic rises in sea levels, ultimately swamping low-lying islands and coastal regions and threatening the flood defenses of cities such as London. The last time so much ice ..... (lose) from the poles-in a period between ice ages 129000 years ago-global sea levels ..... (rise) by 4-6 metres. Experts ..... (believe) many coastal regions ..... (suffer) long before sea levels ..... (rise) significantly, because even a minor rise ..... (make) storm surges more devastating and increases the risk of flooding.

### SECTION-C

7. Draft a business letter complaining against delay in supply of fertilizers for which an order was earlier placed by your company. Imagine details.
8. Read the following passage carefully and summarize it : (about one third). Also give a suitable title.

The “best health care at the lowest possible cost” should be: inclusive; make health-care providers accountable for cost and quality; achieve a reduction in disease burden, and eliminate catastrophic health expenditures for the consumer. All of this is not happening overnight simply because an audacious, nation-wide health-care programme is on the anvil. It could come about, however, if accompanied by the nuts and bolts of good governance that will support solutions and systems to achieve these objectives. In the matter of inclusion, over 15 years ago, the Vajpayee government commissioned the Institute of Health Systems (IHS), Hyderabad to develop a ‘family welfare linked health insurance policy’. In 2003, the Director of the IHS Hyderabad delivered a broad-based Family Health Protection Plan (FHPP), open to all individuals. (A) The fact is that any discourse on universal health care in India gets stymied by the sheer size and ambivalence of the numbers involved. This 2003 solution of the Vajpayee-era recommended, inter alia, that good governance lies in aligning the income lines for health and housing. In other words, de-link entitlement to health care from the poverty line. In that event, the income lines for housing (updated from time to time), could be simultaneously applicable for health entitlement. The government could then proceed, as per capacity, to scale the health premium subsidy in line with housing categories — economically weaker sections (entitled to 75-90%), lower income (entitled to 50%), and middle income groups (entitled to 20%).

9. Draft a report on the Athletics and Sports Day organized by your institution.

**NOTE : Disclosure of Identity by writing Mobile No. or Making of passing request on any page of Answer Sheet will lead to UMC against the Student.**
