PART - A**All questions carry equal marks in Part - A [4 x 10 = 40M]****Answer any FOUR in Part - A**

1. Ask your Manager to increase your salary--Write a dialogue. [10M]
2. Discuss the importance of life skills. [10M]
3. Describe an important festival that you celebrate in your village. [10M]
4. 'Coastal corridor' is going to destroy agricultural land as well as environment-Discuss. [10M]
5. Give the meaning of the underlined word and write down your own sentence using the word.

Jawaharlal Nehru, the first Prime Minister of India, in his utterance, asked the people of India to take a pledge that they would work with dedication for the poor and suppressed. The vicious measures of the rich for the exploitation of the poor stunted the economic growth of the country. Hence every citizen must render self-less service substantially, with a vision towards a modern India which has a unique and valuable heritage.

II. Correct the following sentences.

- (i) The sweets are the uses of the adversity.
- (ii) He ordered for story books.
- (iii) He said that he is not coming.
- (iv) The student gave the examination.
- (v) Scarcely had he gone, then the rain started..
- (vi) He can play violin.

[3M]

7.(c) Read the following passage and pick the adjectives and Adverbs.

The rampant crowd attacked a big shop and looted it entirely. The mischievous boys and the lovely girls ran wildly into all the shops. They chose the playing toys, dark chocolates and colourful hair bands eagerly. The police watched it helplessly.

[3M]

7.(d) What is Tone? Explain with examples.

[3M]

PART –C

8. Read the following passage and Answer all the questions.

Recent archaeological evidences indicate that European man is far older than was previously thought. And the evidence is breaking down a line of thinking called the diffusion theory. This theory suggests that civilization as we know it originated in the Middle East and then slowly diffused throughout the world, including Europe. It is a theory that has been generally accepted for years. An example of this change in thinking can be provided on the island of Malta, where some stand ruined stone temples of unknown origin. Although scientists and archaeologists were quite certain that they were built before the ancient Greeks and Romans, the general opinion was that the time gap between these temples and the age of ancient Greeks and Romans was not great.

**Code No: R10101 / R10****Set No. 1**

Now through a miraculous new process of establishing the dates of civilizations, called radio carbon dating, we can be certain that these temples were in fact under construction before 3000 B.C that is before the pyramids of Egypt. In fact it has now become certain that many of the great stone tombs that are dotted around Europe were built around 4000 B.C and are quite the oldest buildings in existence. So the diffusion theory is being replaced by a revolution in historical thinking, which suggests that the creation of civilized objects such as stone building and metallurgy was not passed onto Europe by superior beings from the East, but in fact occurred spontaneously in different parts of the world.

Answer the following questions briefly.

- (i) What does recent archaeological evidence indicate?
- (ii) What does the diffusion theory suggest?
- (iii) What were scientists and archaeologists quite sure about?
- (iv) What is the process by which we can establish the dates of civilization?
- (v) What does the theory which has replaced the diffusion suggest?

[3M]

7.(d) Explain the features of 'Intonation'.

[3M]

PART-C

8. Read the passage and answer the questions

A river is any natural stream of fresh water, larger than a brook or creek, which flows in a well defined channel. Usually it discharges into another larger body of water: an ocean, a lake or another river. In rare instances, in regions of porous soil it soaks into the ground, or in excessively dry regions, evaporates, in which case it becomes a lost river. In other regions of favourable rock conditions it may also run under ground for certain distance.

Disappearing and re appearing one or more times, a river with a well-cut channel and a graded bed, usually reaching base level at its mouth, is an adolescent river. Rivers as they grow older usually widen their valleys accordingly, unless prevented by certain geological formations or occurrences. A river whose upper waters sometimes in the past suddenly found a new outlet, diminishing the volume and force of the original river and also its length, is known as beheaded river. In general the size of river depends on the geographical land scape, which ranges from the insignificant drainage areas of streams rising on high ground near the coast and flowing straight down the sea, to immense parts of the continents, where rivers rising on the slopes of mountain ranges far inland have to traverse vast stretches of valleys and plains before reaching the oceans.

Code No: R10101 / R10

Set No. 2

Answer the following questions briefly.

- (i) Which phrase tells you that the shape of land affects the diamond shape of the river?
- (ii) In some cases a river dries up. Name the two conditions when these happen?
- (iii) Can a river become invisible at times? If yes when?
- (iv) What factors obstruct the natural process of older rivers increasing their width?
- (v) If part of river suddenly changes its direction, how does it affect the entire river?
