

Q.P. Code: 302001

Reg. no.:

Third Professional MBBS (Part I) Degree Supplementary Examinations
January 2021

Oto-Rhino Laryngology

Time: 2 Hours

Total Marks: 40

- Answer all questions to the point neatly and legibly • Do not leave any blank pages between answers • Indicate the question number correctly for the answer in the margin space
- Answer all parts of a single question together • Leave sufficient space between answers
- Draw diagrams wherever necessary

Essay: (10)

1. A 13 years old boy came to the OPD with torrential bleeding from the right nasal cavity. He gives a history of a similar episode of profuse, unprovoked bleeding from the right nasal cavity 6 months back, when the bleeding stopped by itself. Post nasal examination revealed a smooth, lobulated pink swelling blocking the choana. Answer the following:
 - What is the most probable diagnosis
 - Discuss the etiopathogenesis of the condition
 - Mention four relevant investigations and the expected findings in each
 - Discuss the treatment options for this patient (1+2+4+3)

Short notes: (4x3=12)

2. Unpaired laryngeal cartilages
3. Treatment of Bell's palsy
4. Indications for tracheostomy
5. Clinical features and treatment of Otosclerosis

Draw and label: (2x2=4)

6. Blood supply of palatine tonsil
7. Organ of Corti

Answer briefly: (5x2=10)

8. Differences between antrochoanal and ethmoidal polyp
9. Complications of mastoidectomy
10. Quinsy
11. Lignocaine in ENT
12. Otitomycosis

Give precise answers: (4x1=4)

13. Two types of nasal bone fracture
 14. Two features of tuberculous otitis media.
 15. Two causes of membrane over palatine tonsil.
 16. Two techniques to manage posterior nasal bleeding.
