ANATOMY- PAPER I**Time: 3 Hours****Total Marks: 50**

- Answer all questions
- Draw diagrams wherever necessary

Long Essay**(10)**

1. A 48 year old woman came to the surgery out-patient department with complaint of a lump in her right breast. On examination, surgeon found that the lump was hard and painless and in the upper outer quadrant of right breast. Axillary lymph nodes on the right side were enlarged and right breast was not mobile. Histopathological examination revealed malignancy of right breast. With your knowledge in anatomy answer the following questions:

- What is the normal extent of breast both vertically and horizontally
- Name three muscles related to the base of the breast.
- What could be the reason for loss of mobility of breast in this condition
- Describe the lymphatic drainage of the breast
- Describe the arterial supply of the breast

(1+1½+1+3½+3=10)**Short essays****(3x5=15)**

2. Right atrium – gross anatomy and development
