

Q.P.CODE:M102D020

**Dr. YSR UNIVERSITY OF HEALTH SCIENCES::AP::VIJAYAWADA-520 008**  
**FINAL M.B.B.S. PART-II - DEGREE EXAMINATION - DECEMBER, 2023**  
**GENERAL SURGERY**  
**PAPER-I (Theory Questions)**

Time : 2 Hours 40 Minutes

Max. Marks : 80

Note : Answer all questions. Draw a neat diagram wherever necessary

**SECTION-II (THEORY QUESTIONS - 80 MARKS)**

**WRITE ESSAY ON THE FOLLOWING:**

**2X15=30**

1) A 35 year old lady reported to our department with a chief complaint of a slowly growing swelling without any symptom of pain on the right side of face since 4 months. On local extra oral clinical examination, there was a marked facial asymmetry. No facial nerve palsy. On palpation, the swelling was firm, non-fluctuant, non-tender and movable. A fine needle aspiration cytology (FNAC) of the mass was done wherein branching cellular clusters of epithelial and myoepithelial cells were seen. What is your diagnosis. Enumerate tumors of parotid. Write about pleomorphic adenoma.

2) A 40 year male presented with scrotal swelling. Swelling is painless and translucent. What is the probable diagnosis. Discuss aetiology, clinical features, complications and treatment of hydrocele. Add a note on epididymo-orchitis

**WRITE SHORT NOTES ON THE FOLLOWING:**

**10X5=50**

- 3) Pathophysiology of burns
- 4) Fresh frozen plasma
- 5) Discuss total parenteral nutrition
- 6) Classify wounds. Write in detail about wound healing
- 7) Classify cleft lip and cleft palate. Discuss management of cleft lip
- 8) Etiopathogenesis, clinical features, investigations and management of varicose veins
- 9) Write about lymphedema
- 10) Abdominal aortic aneurysm
- 11) Infected sebaceous cyst
- 12) How to break bad news to the patient
