SOFTWARE PROCESS AND PROJECT MANAGEMENT

Time: 2 Hours   Max.Marks:75

Answer any five questions
All questions carry equal marks
---

1.   What are the characteristics of repeatable process? Discuss the key actions required to advance from repeatable process to defined process.   [15]

2.a)   Discuss the critical problems in software cost estimation.
  b)   List the attributes of a good estimate of software cost.   [15]

3.   What is the need of checkpoints of the process? Illustrate a typical sequence of project checkpoints of a relatively large project.   [15]

4.   Show the focus of software assessment team activities over the project life cycle. [15]

5.a)   Debate between source lines of code and function points.
  b)   Describe the role of inspections and walkthroughs in software management.   [15]

6.a)   List the basic principles of software process assessment.
  b)   Discuss the common misconception about software process.   [15]

7.   Explain artifact evolution over the software development life cycle.   [15]

8.   Give the information structure provided by work break down structure. Discuss the fundamental flaws in conventional work break down structures.   [15]
