OTORHINOLARYNGOLOGY PAPER-II

Time: 3 hours ENT/J/19/28/II

Max. Marks:100

JUNE 2019

Important instructions:

- Attempt all questions in order.
- Each question carries 10 marks.
- Read the question carefully and answer to the point neatly and legibly.
- Do not leave any blank pages between two answers.
- Indicate the question number correctly for the answer in the margin space.
- Answer all the parts of a single question together.
- Start the answer to a question on a fresh page or leave adequate space between two answers.
- Draw table/diagrams/flowcharts wherever appropriate.

Write short notes on:

1. a) Surgical repair of septal perforations. b) What are the factors influencing the various surgical approaches to frontal sinus? 2. a) Nasal resistance and how it is measured. b) Describe defense mechanism of the nasal mucosa. c) Pregnancy induced rhinitis (PIR). 3. a) Embryological development of nose and paranasal sinuses. b) Surgical anatomy of uncinate process. 4. a) Describe endoscopic reconstruction options after hypophysectomy & supra sellar masses excision. b) Rheumatological criteria for the classification of Wegener's granulomatosis. 5. Clinical features, investigations and surgical strategy for a case of inverted papilloma. 6. a) Ergonomic setup of patient, surgeon, instruments and other staff members for FESS surgery. b) How to up-keep nasal endoscopes? 7. a) Complications in revision endoscopic sinus surgery for nasal polyposis. b) Precautions, steps and techniques you can use to prevent them. 8. a) Treatment for allergic rhinitis in children. 5+5 b) Role of immunotherapy in adults and children. 9. Clinical features, investigations and management of a case of salivary gland tumour de-novo in paraphyaryngeal space. 10. a) What are causes of bilateral hypertrophy of inferior turbinate? 5+5 b) What are surgical options to manage such cases and their complications?		write snort notes on:	
b) Describe defense mechanism of the nasal mucosa. c) Pregnancy induced rhinitis (PIR). 3. a) Embryological development of nose and paranasal sinuses. b) Surgical anatomy of uncinate process. 4. a) Describe endoscopic reconstruction options after hypophysectomy & 5+5 supra sellar masses excision. b) Rheumatological criteria for the classification of Wegener's granulomatosis. 5. Clinical features, investigations and surgical strategy for a case of inverted papilloma. 6. a) Ergonomic setup of patient, surgeon, instruments and other staff members for FESS surgery. b) How to up-keep nasal endoscopes? 7. a) Complications in revision endoscopic sinus surgery for nasal polyposis. b) Precautions, steps and techniques you can use to prevent them. 8. a) Treatment for allergic rhinitis in children. b) Role of immunotherapy in adults and children. 9. Clinical features, investigations and management of a case of salivary gland tumour de-novo in paraphyaryngeal space. 10. a) What are causes of bilateral hypertrophy of inferior turbinate? b) What are surgical options to manage such cases and their complications?	1.	b) What are the factors influencing the various surgical approaches to	5+5
b) Surgical anatomy of uncinate process. 4. a) Describe endoscopic reconstruction options after hypophysectomy & 7+3 supra sellar masses excision. b) Rheumatological criteria for the classification of Wegener's granulomatosis. 5. Clinical features, investigations and surgical strategy for a case of inverted papilloma. 6. a) Ergonomic setup of patient, surgeon, instruments and other staff members for FESS surgery. b) How to up-keep nasal endoscopes? 7. a) Complications in revision endoscopic sinus surgery for nasal polyposis. b) Precautions, steps and techniques you can use to prevent them. 8. a) Treatment for allergic rhinitis in children. b) Role of immunotherapy in adults and children. 9. Clinical features, investigations and management of a case of salivary gland tumour de-novo in paraphyaryngeal space. 10. a) What are causes of bilateral hypertrophy of inferior turbinate? b) What are surgical options to manage such cases and their complications?	2.	b) Describe defense mechanism of the nasal mucosa.	3+4+3
supra sellar masses excision. b) Rheumatological criteria for the classification of Wegener's granulomatosis. 5. Clinical features, investigations and surgical strategy for a case of inverted papilloma. 6. a) Ergonomic setup of patient, surgeon, instruments and other staff members for FESS surgery. b) How to up-keep nasal endoscopes? 7. a) Complications in revision endoscopic sinus surgery for nasal polyposis. b) Precautions, steps and techniques you can use to prevent them. 8. a) Treatment for allergic rhinitis in children. b) Role of immunotherapy in adults and children. 9.
