

PAEDIATRIC SURGERY**PAPER-II**Time: 3 hours
Max. Marks:100

PED.SURG 2/D/19/29/II

Important Instructions:

- Attempt all questions in order.
- Each question carries 10 marks.
- Read the question carefully and answer to the point neatly and legibly.
- Do not leave any blank pages between two answers.
- Indicate the question number correctly for the answer in the margin space.
- Answer all the parts of a single question together.
- Start the answer to a question on a fresh page or leave adequate space between two answers.
- Draw table/diagrams/flowcharts wherever appropriate.

Write short notes on:

- What are the deformities associated with a first branchial arch and cleft? Discuss the route taken by a first branchial arch tract. 4+4+2
 - Describe the embryology of thyroglossal remnants and its relevance during surgical excision.
 - Describe the management of angular dermoid cyst.
- Discuss management of a large lymphangioma in the neck and axilla extending into the thorax. 4+3+3
 - Management of congenital salivary fistula.
 - Management of congenital torticollis.
- Discuss all the precautions taken to decrease infection rate in a child undergoing ventriculo-peritoneal shunt for hydrocephalus. 4+4+2
 - Discuss long term problems with ventriculo-peritoneal shunt and their management.
 - What is the relationship between meningocele and hydrocephalus?
- Describe the different types of bronchopulmonary sequestration and its management. 4+6
 - Discuss antenatal diagnosis and therapy in bronchopulmonary malformations.
- Discuss long term post-operative results of esophageal replacement for pure esophageal atresia. 5+5
 - Discuss various methods of using native esophagus in pure and long gap esophageal atresia.
- Discuss lung development in diaphragmatic hernia. 2+4+4
 - Discuss management of a child diagnosed with right sided congenital diaphragmatic hernia.
 - Discuss advantages and disadvantages of thoracoscopy in repair of left sided congenital diaphragmatic hernia.

P.T.O

PAEDIATRIC SURGERY**PAPER-II**

7. a) Discuss management of a neonate with concomitant esophageal atresia and anorectal malformation and problems faced during the same. 3+3+4
b) Discuss embryology, management and long term outcome of apple peel atresia.
c) What are the principles of surgical management in a neonate with jejunoileal atresia? Give diagrams to explain the same.
