2010 Scheme

Q.	.P. Code: 105001	Reg. No.:
	First Professional MBBS Degree S July 202	••••••
Biochemistry – Paper I		
Tiı	 me: 3 Hours Answer all questions to the point neatly and legal answers Indicate the question number correstion answer all parts of a single question together Draw table/diagrams/flow charts wherever necestion 	ectly for the answer in the margin space Leave sufficient space between answers
Es	say	(10)
1.	What are the types of fatty acid oxidation. Exp	lain in detail the oxidation of palmitic
Sh	acid and its regulation ort essays	(1+7+2) (2x5=10)
2.	Competitive Inhibition of enzymes with examp	es
	Glucose transporters ort notes	(5x3=15)
4.	Transamination reactions	
5.	Active transport	2
6.	Von-Gierke's disease	0,
7.	Dietary fibre	
	I ransamination reactions Active transport Von-Gierke's disease Dietary fibre Biologically important peptides	(5x2=10)
9.	Products of HMP shunt pathway	
10	. PUFA (Poly Unsaturated Fatty Acids)	
11	. Micelles	
12	. Why sucrose is a non reducing sugar	
	. Classification of Lipoproteins ve precise answers:	(5x1=5)
14	.Normal range of serum urea and creatinine	
15	. Define hypoglycemia	
16	Name aromatic amino acids	
17	. Enzyme deficient in Galactosemia	
18	Name two causes for hyperlipidemia
