Q.41 Match the **Planning Terms** in Group – I with their **Descriptions** in Group – II.

Ranker.com

GATE 2015

	Group-I		Group-II
Р	Gentrification	1	Haphazard and low density outward growth of urban area
Q	Urban core revitalization	2	Primarily dormitory settlement with functional dependency on parent city
R	Urban sprawl	3	Replacement of low income residents with high income population
S	Satellite town	4 5	Physical and socio-economic revival of the inner-city Restricted development in an environmentally sensitive zone
· /	P-4, Q-3, R-5, S-2 P-1, Q-5, R-2, S-3		(B) $P - 3$, $Q - 4$, $R - 1$, $S - 5$ (D) $P - 3$, $Q - 4$, $R - 1$, $S - 2$

Q.42 Match the **Planning Concepts** in Group – I with their **Corresponding Proponents** in Group – II

	Group-I	Group-II
Р	Broadacre city	1 Le Corbusier
Q	Radiant city	2 F. L. Wright
R	Industrial town	3 Robert Owen
S	Arcosanti	4 Henry Wright
		5 Paolo Soleri
(A) F	P-1, $Q-4$, $R-3$, $S-5$	(B) $P - 1$, $Q - 3$, $R - 5$, $S - 2$
(C) P	P-2, $Q-1$, $R-3$, $S-5$	(D) $P - 2$, $Q - 1$, $R - 5$, $S - 4$

- Q.43 The housing stock of a town has total number of 9090 dwelling units. Present population of the town is 45,450. Assuming an average household size of 4.5, the housing shortage in percentage is
- Q.44 A hall is 15 m long and 12 m wide. If the sum of areas of the floor and ceiling is equal to the sum of the area of its four walls, then the volume of the hall in cubic meter is ______
- Q.45 The actual roof area of a building is 3,60,000 sqm, which on a site plan measures 25 sqcm. The scale of the site plan is 1 : _____
- Q.46 If the annual net income from a commercial property is Rs 22,000/- and the interest rate is 8%, then the capitalized value in rupees of the property in perpetuity is
- Q.47 A five storied building is constructed on a 100 m x 50 m plot having ground coverage of 60% (option 1). Alternatively, a four storied building is constructed on the same plot with a 50% ground coverage (option 2). The ratio of FARs between options 1 and 2 is ______
- Q.48 If a roof is treated with a layer of thermal insulation material, the internal heat gain is reduced by 60%. The U-value of the roof slab (without thermal insulation) is 3 W m² / $^{\circ}$ C. Assuming a constant temperature difference between indoor and outdoor, the U-value of the thermal insulation layer in W m² / $^{\circ}$ C is ______
- Q.49 A simply supported beam having effective span of 5 meter is carrying a centrally concentrated load of 16 kN. The maximum bending moment in the beam in kN-m is _____

GATE 2015

- Q.50 A landscaped garden with irregular profile and minor undulations, measuring 35,000 sqm, has a total surface area covered with 20% brick paving, 15% cement concrete paving, and rest with grass. The peak intensity of rainfall in that region is 70 mm/hr. The coefficient of runoff for brick paving, cement concrete paving and grass is 0.8, 0.9 and 0.5 respectively. The estimated quantity of runoff in cubic meter/hr for the entire garden area is ______
- Q.51 The number of standard cement bags required to prepare 1400 kg of concrete in the ratio of 1 : 2 : 4 (mixed by weight batching) is_____
- Q.52 A class room measuring 10 m (L) x 8 m (B) x 2.7 m (H) requires an illumination level of 500 lux on the desk level using 40 W fluorescent lamps with rated output of 5000 lumens each. Assuming utilization factor of 0.5 and maintenance factor of 0.8, the number of lamps required is
- Q.53 Area of tensile steel per meter width of a reinforced concrete slab is 335 sq mm. If 8 mm rods are used as reinforcement, then centre to centre spacing of the reinforcement in mm is _____
- Q.54 The population of a town as per Census 2011 was 22,730 and the population as per census 2001 was 15,770. Considering arithmetic projection of growth, the projected population in 2016 will be
- Q.55 Two concrete mixers of capacity 200 liters each are used in a construction site to produce 20 cubic meter of concrete. Ingredient charging, mixing and discharge times are 3 minutes, 7 minutes and 1 minute respectively. Assuming a time loss of 5 minutes per hour of operation, the total time in hours for the mixers to produce the required amount of concrete will be ______
