## CHIADAT TECHNOLOCICAL UNIVERSITY

| GUJARAT TECHNOLOGICAL UNIVERSITY   |            |   |          |
|--|------------|---|----------|
| BE - SEMESTER–VII (NEW) EXAMINATION – WINTER 2018<br>Subject Code: 2172601 Date: 15/11 |            |   | /2018    |
| Subject Name: Rubber Equipment Design-II   |            |   |          |
| Time: 10:30 AM TO 01:00 PM Total Marks:<br>Instructions:                               |            |   | s: 70    |
|  | 1.<br>2.   | Attempt all questions.  |          |
|  |            |   | MARKS    |
| Q.1  | (a)        | Give the importance of Parting line in Mold.  | 03       |
|  | <b>(b)</b> | Write the factors affecting the design and construction of the mold.                                    | 04       |
|  | (c)        | Discuss in detail about "Cryogenic Deflating".  | 07       |
| Q.2  | <b>(a)</b> | "Strength of the cavity is important parameter in mold design" justify the statement.                   | 03       |
|  | <b>(b)</b> | Write the properties required for Sprue Bush.   | 04       |
|  | (c)        | Explain the Transfer molding process in detail with diagram and write the                               | 07       |
|  |            | advantages of transfer molding over compression molding.<br>OR  |          |
|  | (c)        | Explain in detail about Thermal Consideration for Transfer molding.                                     | 07       |
| Q.3  | (e)<br>(a) | Give the function & importance of Die.  | 03       |
| · ·  | <b>(b)</b> | List the important aspects for practical die design.  | 04       |
|  | (c)        | Write a Short note on "Die Geometry"  | 07       |
| Q.3  | <b>(a)</b> | OR<br>"Strength and rigidity is important factors for die design" justify the<br>statement.             | 03       |
|  | <b>(b)</b> | Which materials are used for die construction?  | 04       |
|  | (c)        | Rubber extruder die is essentially a stream lined channel'-Explain the statement.                       | 07       |
| Q.4  | (a)        | Define the term (1) Lead (2) Compression Ratio (3) Starts   | 03       |
| <b>X</b>   | (b)        | Give the difference between Hot feed and Cold feed Extruder.  | 04       |
|  | (c)        | Explain the Thermal conductivity and Boundary layer affects Extrusion                                   | 07       |
|  |            | cooling.  |          |
| Q.4  | (a)        | OR<br>Write the importance of Feed Roller in Extruder.  | 03       |
| Q.4  | (a)<br>(b) | Give the difference between Bimetallic liner and Induction Liner.                                       | 03<br>04 |
|  | (c)        | Discuss the effects of the Screw & Barrel temperature in detail.  | 07       |
| Q.5  | (a)        | Define the term (1) Shot capacity (2) Locking Force (3) Sink Mark.                                      | 03       |
| C  | <b>(b)</b> | List out and Draw the different design of Runner cross section.   | 04       |
|  | (c)        | Discuss the factors which influencing mold filling in Injection molding.                                | 07       |
|  |            | OR  |          |
| Q.5  | <b>(a)</b> | Write the disadvantages of Injection Transfer molding.  | 03       |
|  | <b>(b)</b> | Give the comparison between Insulated runner systems and Internally                                     | 04       |
|  | (c)        | heated runner system.<br>List out the different types of Injection Units and explain any two in detail. | 07       |
