[Time: 3 Hours] [Max. Marks: 100]

Advanced Pharmacology and Toxicology (Revised Scheme 4)

Q.P. CODE: 9349

Your answers should be specific to the questions asked. Draw neat, labeled diagrams wherever necessary.

LONG ESSAY (Answer any TWO)

2 X 20 = 40 Marks

- Enumerate various cell surface receptor families and explain the transduction pathway involved in ion channel receptors and tyrosine kinase linked receptors.
- Explain pathophysiology and pharmacotherapy of Parkinson's and Alzheimer's disease. (10+10)
- What is mutagenicity? Enlist and explain various mutagenicity studies. (2+18)

SHORT ESSAY (Answer any FIVE)

5 X 10 = 50 Marks

- Explain the pathogenesis of cardiac arrhythmias and write the pharmacology of any one drug used for treatment of arrhythmias. (4+6)
- 5. Explain the role of neurotransmitters as signaling molecules with examples.
- Explain biosynthesis, physiological roles of 5-hydroxy tryptamine. (4+6)
- Explain the principles and methods involved in male reproductive toxicity studies. (5+5)
- 8. Write a note on pharmacotherapy and critical analysis of rational use of drugs for COPD. (7+3)
- 9. Explain cAMP as intracellular signal transduction secondary messenger.

SHORT NOTES 2 X 5 = 10 Marks

- Explain the pharmacotherapy of congestive heart failure.
- Explain the generation and actions of cytokines.
