

FACULTY OF SCIENCE

B.Sc.V – Semester (Practical) Examination

Subject: Geology

Paper: V

Question Bank

Time: 2 Hours Max

Marks: 25

I. Identify the Fossils (from 1-6) and write their Morphology, classification, geological age and stratigraphic position of important of Invertebrate fossils? (6×2 = 12Marks)

1.Cidarid, 2.Micraster, 3. Holaster, 4.Hemister, 5.Terebratulid, 6.Spirifer, 7.Rhynchonella, 8.Productus, 9.Turritella, 10.Murex, 11.Cypraea, 12.Natica, 13.Valuta, 14.Pecten, 15.Gryphaea, 16.Arca, 17.Cardita, 18.Exogyra, 19.Nutilus, 20.Ammonoids, 21.Bellerophonites, 22.Calymene, 23.Paradoxides, 24.Corals, and 25.Graptolites.

II. Identify the Fossil 7 and drawing their figure, Morphology, classification, geological age and stratigraphic position of important of Invertebrate fossils? (1×3= 3Marks)

1.Cidarid, 2.Micraster, 3. Holaster, 4.Hemister, 5.Terebratulid, 6.Spirifer, 7.Rhynchonella, 8.Productus, 9.Turritella, 10.Murex, 11.Cypraea, 12.Natica, 13.Valuta, 14.Pecten, 15.Gryphaea, 16.Arca, 17.Cardita, 18.Exogyra, 19.Nutilus, 20.Ammonoids, 21.Bellerophonites, 22.Calymene, 23.Paradoxides, 24.Corals, and 25.Graptolites.

III. Identify the Fossils 8 and Morphology, classification, geological age and stratigraphic position of important of Plant fossils? (1×2 = 2Marks)

1.Glossopteris, 2.Gangamopteris, and 3.Ptylophyllum

IV. Identify the Fossils 9 and drawing their figure, Morphology, classification, geological age and stratigraphic position of important of Plant fossils? (1×3= 3Marks)

1.Glossopteris, 2.Gangamopteris, and 3.Ptylophyllum

Paper VI (Elective)

Question Bank

QUESTION NO.1

Determine the grain size distribution from the given data

(3X1= 3M)

A.

S. No	1	2	3	4	5	6	7	8	9	10
Size of the Grains	0.05	0.06	0.12	0.16	0.18	0.35	.050	0.71	1.18	2.0
Weight of the sample	3.30	7.22	0.15	73.90	126.50	44.91	15.29	20.26	4.0	3.59

B.

S. No	1	2	3	4	5	6	7	8	9	10	11	12	13
Size of the Grains	0.05	0.06	0.12	0.16	0.18	0.35	.050	0.71	1.51	2.0	5	10	12
Weight of the sample	1.762	0.720	0.200	10.255	7.309	6.250	4.931	15.431	21.925	38.185	5.030	13.00	15.05

C.

S. No	1	2	3	4	5	6	7
Size of the Grains	0.35	0.50	0.71	1.51	2.0	5	7
Weight of the sample	6	30	64	6	34	26	34

D.

S. No	1	2	3	4	5	6	7	8
Size of the Grains	4.75	20.0	0.84	0.425	0.250	0.150	0.075	0.025
Weight of the sample	9.74	39.50	75.60	129.10	107.40	8.50	4.20	6.58

E.

S. No	1	2	3	4	5	6	7	8	9	10	11	12
Size of the Grains	10	5	2	1.18	0.71	0.5	0.35	0.25	0.18	0.12	0.06	0.05
Wt of the sample	13	5.030	38.185	21.925	15.435	6.250	7.309	10.255	0.200	0.720	1.762	2.054

QUESTION NO. II

Determine the physical properties of the Industrial minerals

2. Barite 3. Asbestos 4. Clay 5
. Coal 6. Kyanite 7. Gypsum 8. Quartz 9. Mica 10. Feldspars

(2x1 = 2M)

QUESTION NO. III.

Study the beach profile

11.

12.

13.

(3X1= 3M)

QUESTION NO. IV

1. The alkalinity and hardness of a water sample are 250mg/l and 350mg/l calculate CaCO_3 of the given water sample.

2. Water contains following dissolved ions $\text{Na}^+ = 56 \text{ mg/l}$; $\text{Ca}^{+2} = 40 \text{ mg/l}$; $\text{Al}^{+3} = 3 \text{ mg/l}$; $\text{Ph} = 7$; $\text{HCO}_3^- = 190 \text{ mg/l}$ $\text{Mg}^{+2} = 30 \text{ mg/l}$ $\text{Cl}^- = 165 \text{ mg/l}$ Calculate total hardness of the sample in mg/l as Ca CO_3

(equivalent weight of $\text{Ca CO}_3 = 50$)

3. Water contains following dissolved ions $\text{Ca}^{+2} = 40 \text{ mg/l}$; $\text{Al}^{+3} = 3 \text{ mg/l}$; $\text{Ph} = 7$; $\text{HCO}_3^- = 30 \text{ mg/l}$ $\text{Mg}^{+2} = 18 \text{ mg/l}$; $\text{CO}_3 = 5$; $\text{Ca}^{+2} = 12$; $\text{Cl}^- = 15 \text{ mg/l}$; $\text{SO}_4^{-2} = 15$; $\text{Ph} = 8.5$ Calculate total hardness of the sample in mg/l as Ca CO_3 (equivalent weight of $\text{Ca CO}_3 = 50$)

(2x1 = 2M)

QUESTION NO. V

1. Ph of water incoming water is 7.2 and out coming water is 8.4. Find the average value of Ph of the water sample.

2. Find the Ph of the given sample if OH^- ion concentration is $10^{-5.6}$ milli moles/litres (convert milli moles to moles/liter) and interpret the nature of the sample.

3. If Ph of the water sample is given as 9.25 then find the concentration of hydroxyl ion

(3x1 = 3M)

QUESTION NO. VI

1. Estimation of Manganese by spectrophotometric method and write the procedure for the experiment.
2. Estimation of Oxygen dissolved by the titrimetric method with procedure.
3. Estimation of Sodium by Flame photometer with procedure

(3x1= 3M)

QUESTION NO. VII

Sieve Analysis with procedure

(1x5 = 5M)

QUESTION NO. VIII

Subject: Hydrogeology

Paper VI (Elective)

Question Bank

Max. Marks: 25

(1x2.5 = 2.5M)

Time 2 hours

QUESTION NO. 1

- a. A constant head permeability test has been run on a sand sample of 25cm in length and 30cm² in area under a head of 40cm. The discharge was found to be 200 cc in 116 seconds. Determine the coefficient of permeability.
- b. Falling head permeability test has been done on a relatively fine grained soil sample 20cm in length and 25cm² in area. In the sand pipe, the initial head h_0 is 0.5 cm and the final reading of h_f is 0.25cm after a time lapse of 8 min. The diameter of the sand pipe is 2.51cm. Calculate the permeability of the given soil sample.
- c. An unsaturated core sample is obtained from a sandy material at a distance of about 50 cm above water table. The core is 10.186cm height and 5 cm in diameter. The net weight of sample in air is 147.6 gms, weight of the sample after saturation of water is 87.08gms. Weight of the sample in air is 152.14gms. Calculate the grain volume, bulk volume, bulk density, apparent density and porosity of the sample.

(1x3 = 3M)

QUESTION NO. II

Determine the Uniform Co-efficient from the Grain size distribution data of the River alluvium

A.

S.No	1	2	3	4	5	6	7	8
Size of the Grains (mm)	4.20	8.50	105.08	107.40	120.10	71.00	39.80	9.79
Wt of the sample in gms	0.89	1.79	22.20	22.16	27.17	15.10	8.32	2.06

B.

S. No	1	2	3	4	5	6	7	8	9	10	11	12

QUESTION NO. III.

(1x2.5 = 2.5M)

Determine the pH Electrical conductivity and TDS in the given water sample

QUESTION NO. IV

(1x2= 2M)

Describe the Well inventory data details of the given area in detail and explain.

QUESTION NO. V

(1x2.5=2.5M)

Draw a Water table contour map, show the regional direction of flow and comment on the nature of the Stream
