## JAWAHARLAL NEHRU TECHNOLOGICAL UNIVERSITY HYDERABAD MBA II Semester Examinations, December - 2019 QUANTITATIVE ANALYSIS FOR BUSINESS DECISIONS

Time: 3hours Max.Marks:75

Note: This question paper contains two parts A and B.

Part A is compulsory which carries 25 marks. Answer all questions in Part A. Part B consists of 5 Units. Answer any one full question from each unit. Each question carries 10 marks and may have a, b, c as sub questions.

PART - A

 $5 \times 5$  Marks = 25

- Write notes on the following:
  - a) Applications of Operations Research (OR) in Finance & Accounting. [5]
  - b) Basic Feasible Solutions of Linear Programming Problem (LPP). [5]
  - c) Multiple Optimal Solutions in Assignment Problem. [5]
  - d) Decision Making under Uncertainty. [5]
  - e) Queue Length vs. System Length.

PART - B

 $5 \times 10 \text{ Marks} = 50$ 

Briefly explain the different Techniques of OR. Where are they applied? [10]

OR

- 3.a) What are the advantages of OR?
  - b) How did OR develop in India and where are they being applied now?

[5+5]

[5]

- 4.a) What is a Transportation Problem?
  - Briefly explain the steps involved in solving the Vogel's Approximation Method (VAM).

or

Solve the following Linear Programming Problem graphically:-

Maximize:  $Z = 3X_1+4X_2$ , Subject to:  $X_1 + 2X_2 \le 30$ 

 $X_1 + X_2 \le 10$ and  $X_1, X_2 \ge 0$ 

[10]

6. What is an Assignment Problem? What are its Objectives and Characteristics? [10]

OR

Solve the following Assignment Problem Efficiency Matrix:- [10]

	$B_1$	$B_2$	$B_3$	$B_4$
$A_1$	60	65	70	55
$A_2$	70	60	55	65
$A_3$	65	60	75	70
$A_4$	50	55	60	80

 What is Coefficient of Optimism (Hurwicz Criterion) in Decision-Making under Uncertainty? Briefly explain the same. [10]

OR

- What is Minimax Regret Criterion? Give a hypothetical example of the same. [10]
- 10. At a Sales Counter manned by a single person, customers arrive according to Poisson Distribution, at a mean rate of 20 per hour and the time required to service a customer is expected to follow Exponential Distribution with a mean rate of 120 seconds. Find the Average Waiting Time of a customer in the System and in the Queue.

OR

What is a Q-System? What are its basics elements? Explain the same briefly. [10]

-ooOoo-
