

B. TECH
(SEM VII) THEORY EXAMINATION 2018-19
CRYPTOGRAPHY AND NETWORK SECURITY

Time: 3 Hours

Total Marks: 100

Note: 1. Attempt all Sections. If require any missing data; then choose suitably.

SECTION A

- 1. Attempt all questions in brief.** **2 x 10 = 20**
- a. Define block cipher
 - b. What do you mean by cryptography?
 - c. Define hash algorithm.
 - d. What is stream cipher?
 - e. Differentiate between public key and private key.
 - f. Explain intrusion detection in brief.
 - g. What do you mean by mail security?
 - h. What is DSS in cryptography?
 - i. What do you mean by email security?
 - j. Describe birthday attack.

SECTION B

2. Attempt any *three* of the following: 10 x 3 = 30
- Draw the block diagram of DES algorithm. Also explain its functionality.
 - What is prime and relative prime numbers in cryptography and network security?
 - Discuss the Message Authentication Codes. Also give the use of Authentication requirements in MAC.
 - What is Diffie-Hellman Key Exchange in key management?
 - Explain internet protocol security in detail.

SECTION C

3. Attempt any **one** part of the following: **10 x 1 = 10**
- (a) List the Strength of DES in brief. Also explain the Triple DES.
- (b) What is the Shannon's theory of confusion and diffusion in terms of information security?
4. Attempt any **one** part of the following: **10 x 1 = 10**
- (a) States the Advanced Encryption Standard (AES). Also provide the functioning of AES.
- (b) Explain the Chinese Remainder theorem with example. How Chinese Remainder theorem provide the security to online information sharing transactions.
5. Attempt any **one** part of the following: **10 x 1 = 10**
- (a) What do you understand from hash functions? Discuss the working of Secure hash algorithm (SHA) in Message Authentication
- (b) Explain the Digital Signatures. Also give a detail description of Elgamal Digital Signature Techniques.

- (a) Discuss X.509 Certificates in detail. What is the role X.509 Certificates in cryptography?
- (b) What is Electronic mail security? Provide the application of pretty good privacy (PGP) in transaction Authentication
7. Attempt any **one** part of the following: **10 x 1 = 10**
- (a) Explain Secure electronic transaction (SET) in internet protocol security in detail.
- (b) What do mean by system security? Also discuss Viruses and related threats to system security.
