Paper ID : 154852

Roll No.

B.TECH.

Theory Examination (Semester-VIII) 2015-16

NANOBIOTECHNOLOGY

Time: 3 Hours Max. Marks: 100

Section-A

- Q.l. Attempt all parts. All parts carry equal marks. Write answer of each part in short. $(2\times10=20)$
 - (a) Define macromolecular assemblies.
 - (b) What is nanobiology?
 - (c) Explain about molecular motors and devices.
 - (d) What is Moore's Law?
 - (e) Discuss nanofabrication.
 - (f) What are metallic nanoparticles?

(1) P.T.O. 2405/**98**/4/100

2403/**30**/4/100

00	Describe the role of nanobiotechnology in tumor targeting.	Explain viruses as nanoparticles.	Give a brief idea about nanoparticle based immobilization assays.	Write down the applications of nanotechnology in biological research.

2405/**98**/4/100

- - 保定 Attempt any live parts. All parts carry equal marks:

 $(5 \times 10 = 50)$

Q.3. (a) Draw the block diagram of AFM.

(b) Describe AFM principle. Also write down the re-

quirements for the functioning of AFM.

- (a) Explain Quantum dots and its applications.

(b) What are synthetic biomedical polymers? Giving

suitable examples describe the synthesis and use of

any polymers in biomedical science.

Q.5. (a) What is molecular imprinting? Discuss its basic

MANKHEIR

principle.

Briefly discuss the applications of biosensor.

Q.4. (a) Explain the biological synthesis of metal nanoparticles.

(b) Describe microfabrication technique briefly.
