

FAMILY MEDICINE**PAPER-II**Time: 3 hours
Max. Marks:100

FLM/D/20/08/II

Important Instructions:

- You are provided with 5 answer sheet booklets. Each individual answer sheet booklet consists of 10 pages excluding the covering jackets.**
- Answers to all the questions must be attempted within these 5 answer sheet booklets which must be later tagged together at the end of the exam.**
- No additional supplementary answer sheet booklet will be provided.**
- Attempt all questions in order.
- Each question carries 10 marks.
- Read the question carefully and answer to the point neatly and legibly.
- Do not leave any blank pages between two answers.
- Indicate the question number correctly for the answer in the margin space.
- Answer all the parts of a single question together.
- Start the answer to a fresh page or leave adequate space between two answers.
- Draw table/diagrams/flowcharts wherever appropriate.

Write short notes on:

1. A teenager met with a cycling accident. Bystanders rushed to his aid and found him unresponsive but in a few minutes he recovered and was well enough to take a cab back home. Displaying abundant precaution, his parents have brought him to you. 5+5
 - a) How would you assess this case?
 - b) What are the steps in the management of head injury in this teenager?
2. A 45-year-old man presents with the history of a swelling in the inguinal region which becomes larger when he coughs or sneezes. 5+5
 - a) How would you assess this case?
 - b) What are the steps in the management of this case?
3. A 35-year-old man complains of passing blood in his stools. Defecation is painful as well. 5+5
 - a) How would you assess this case?
 - b) What are the steps in the management of this case?
4. A 70-year-old lady presents to you with history of a fall. She complains of radiating pain to the knee and the inability to put her foot down. 5+5
 - a) How would you assess this case?
 - b) What are the steps in the management of this case?
5. A 55-year-old bus conductor presents to you with a history of heaviness of the legs, pain while walking and itching above the left ankle. 5+5
 - a) How would you assess this case?
