

- ① Thenar space
- ② Midpalmar space.
- ③ pulp space in fingers:
- ④ F.A space of PARANOVA.

Transv. Secⁿ at Midshaft of M.C.

→ Thenar Space
 → MPS

→ palmar aponeurosis

→ FDS

→ FDP.

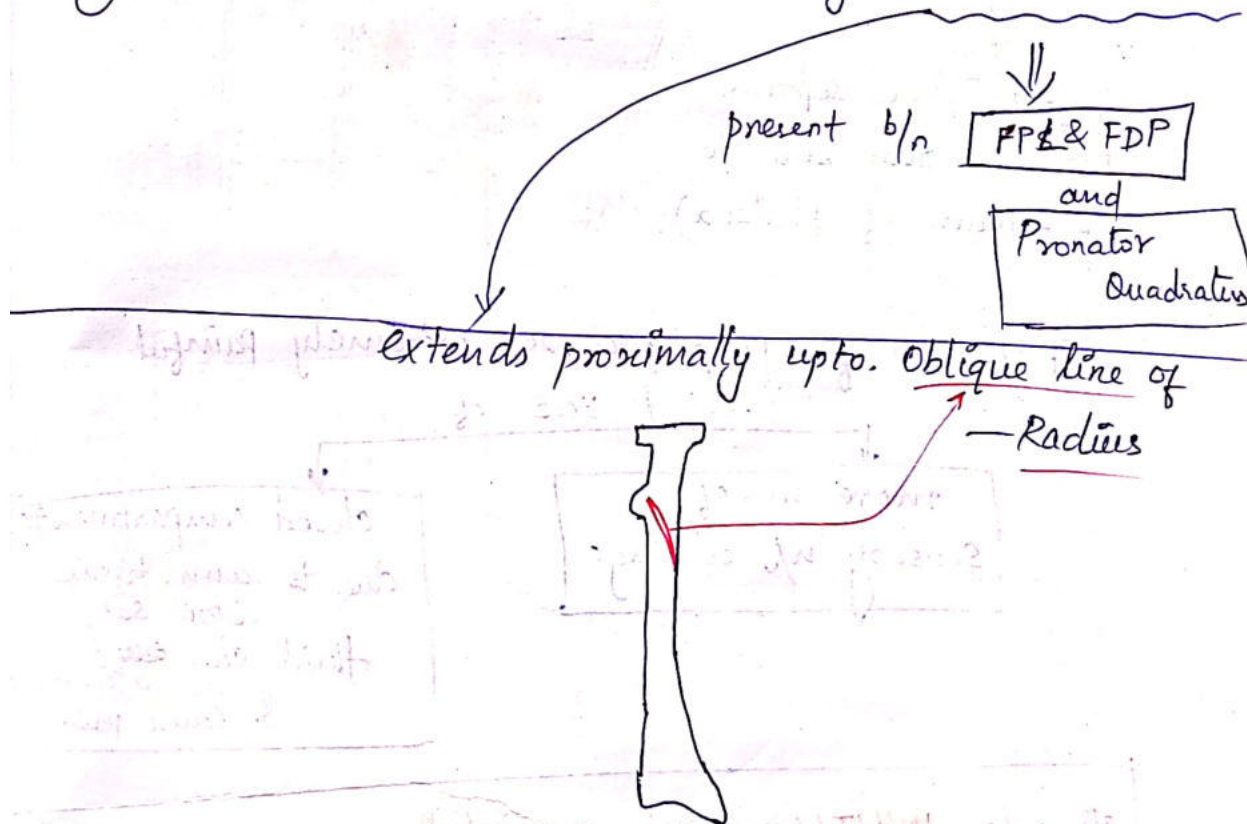

→ intermed. septum
(attached to shaft of IIIrd MC)

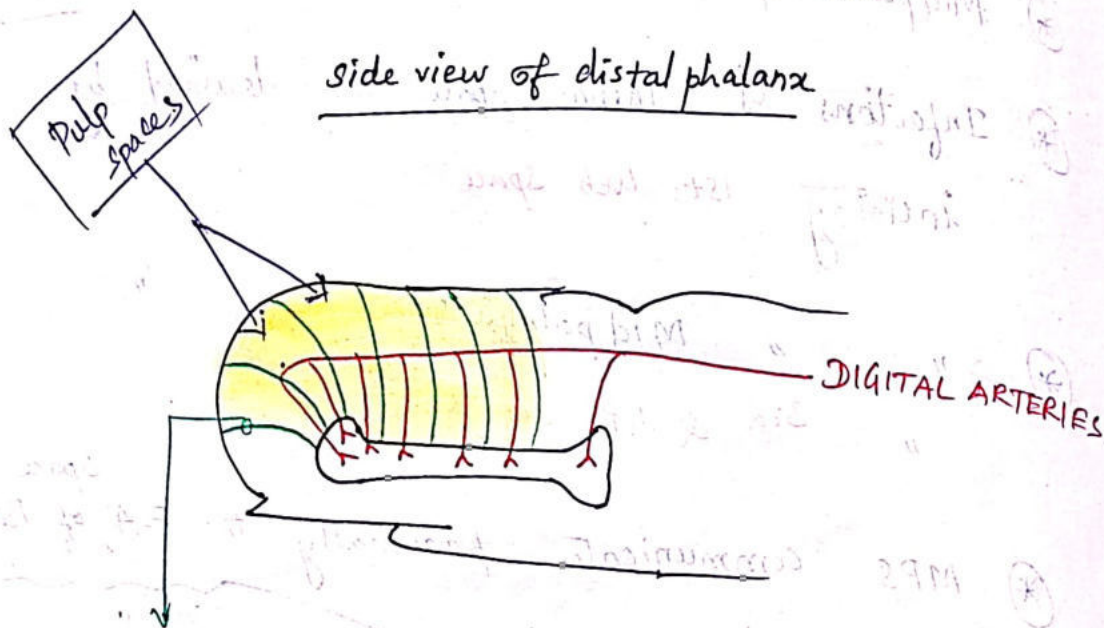

② Mid palmar Space " " " " of L₂, L₃, L₄

③ Infections of Thenar Space are drained by incising 1st web space

④ " " Mid palmar space " " " 3rd & 4th web space

⑤ MPS communicates proximally to F-A_n of Parona space

Conn. Tissue septum
(extends from skin to
periosteum of phalanx).

inflammⁿ of pulp space are extremely painful

Bcoz of

more no. of
sensory n/r endings

closed compartments
due to conn. tissue
septa so
fluid can ~~accu~~ accum.
& cause pain

clinical: WHITLOW / pulp space infecⁿ

↓
AVN of distal 4/5th of distal phalanx.

↓ why?

Bcoz due to infecⁿ the arteries inside
pulp spaces gets compressed. Since base of
distal phalanx don't have pulp space, ∴
so no AVN at base - - -
