## B.Tech IV Year I Semester (R09) Supplementary Examinations, May 2013 AIR POLLUTION AND CONTROL

(Civil Engineering)

Time: 3 hours Max. Marks: 70

Answer any FIVE questions
All questions carry equal marks
\*\*\*\*\*

- 1 (a) Differentiate between stationary and mobile sources of air pollution. Discuss the effects of photochemical smog on human beings and environment as well.
  - (b) Discuss the scope and effects of natural pollutants.
- 2 (a) Discuss the effects of ozone holes on flora and fauna.
  - (b) Explain briefly the history of ozone holes.
- 3 (a) What is the thermodynamics? Why it is relevant in study of air pollution?
  - (b) Discuss the cause of CO production.
- 4 (a) Explain the role of atmospheric levels in the air pollution phenomena.
  - (b) Discuss the various scales of meteorology.
- 5 (a) Explain the phenomenon of wind belts.
  - (b) Explain the Gaussian plume model.
- Explain with a neat sketch, the principle, construction and working of a fabric filters. What are the factors effecting the efficiency of the fabric filters?
- What are the various dry methods for control of  $SO_X$ ? Explain how do you control  $SO_X$  by following methods:
  - (a) Cat  $O_X$  process.
  - (b) SCOT process.
- 8 What are the long term goals recommended by WHO for the following pollutants:
  - (a)  $SO_2$
  - (b) Suspended particles.
  - (c) CO
  - (d) Photochemical oxidant.
