IV B.Tech II Semester Regular Examinations, April/May - 2017 FACTS: FLEXIBLE ALTERNATING CURRENT TRANSMISSION SYSTEMS (Electrical and Electronics Engineering)

Time: 3 hours

Max. Marks: 70

Question paper consists of Part-A and Part-B Answer ALL sub questions from Part-A Answer any THREE questions from Part-B *****

PART-A (22 Marks)

1.	a)	Distinguish between transient stability and steady state stability in power flow	
		systems.	[4]
	b)	Mention the importance of self commutating converters?	[3]
	c)	Write the three important objectives of shunt compensation.	[3]
	d)	What is meant by switched transients in thyristor switched capacitor?	[4]
	e)	What are the characteristics differences between TSSC and TCSC?	[4]
	f)	Mention the practical applications of IPFC.	[4]
		<u>PART-B</u> $(3x16 = 48 Marks)$	
2.	a)	Discuss the various categories of FACTS controllers in brief.	[8]
	b)	Describe the parameter trade-off of high power devices.	[8]
3.	a)	Explain the three phase full-wave bridge converter with necessary waveforms.	[8]
	b)	Enumerate the relative merits and demerits of current source converters over	
		voltage source converters.	[8]
4		Evaluin the concert of and of the college support to prove the second stability in	
4.	a)	Explain the concept of end of the voltage support to prevent voltage stability in	гоı
	b)	Shuft compensation.	[0] [0]
	0)	Describe any of the variable impedance type static VAR generators.	[0]
5.	a)	Discuss the implementation of the VAR reserve control.	[8]
	b)	Enumerate the operating features of STATCOM.	[8]
	0)		[0]
6.	a)	Explain the power oscillation and sub synchronous oscillation damping in series	[8]
		capacitive compensation.	
	b)	Describe the configuration and characteristics of basic thyristor-switched series	[8]
		capacitor.	
7.	a)	Explain the implementation of the UPFC by back-to-back voltage sourced	[8]
	,	converters.	
	b)	Discuss the variation of real and reactive powers in IPFC schemes.	[8]
		1 of 1

Question paper consists of Part-A and Part-B Answer ALL sub questions from Part-A Answer any THREE questions from Part-B ****

		<u>PART–A</u> (22 Marks)	
1.	a)	Mention the voltage and current ratings of high power devices.	[4]
	b)	What are the effects of harmonics in a three phase bridge converter.	[4]
	c)	What is meant by power oscillations damping?	[3]
	d)	Draw the V-I characteristics of thyristor switched capacitor and explain.	[4]
	e)	Write any three functional requirements of series compensation.	[3]
	f)	What is a stand-alone series and shunt compensation?	[4]
		<u>PART-B</u> $(3x16 = 48 Marks)$	
2.	a)	Explain various loading capability limits in power flow systems.	[8]
	b)	Describe relative importance of different types of controllers.	[8]
3.	a)	Enumerate single phase full-wave bridge converter operation.	[8]
	b)	Discuss three-phase current source converter operation in brief.	[8]
4.	a)	Explain midpoint voltage regulation for line segmentation using shunt compensation.	[8]
	b)	Emphasize features of thyristor controlled reactor.	[8]
	- /		[-]
5.	a)	Obtain transfer function of static VAR compensator and mention its	507
		compensation effect on stability.	[8]
	b)	Explain necessary modifications in static VAR generation characteristics due to	503
		regulation slope.	[8]
6.	a)	Draw and explain the impedance versus delay angle characteristics of TCSC.	[8]
	b)	Discuss improvement of transient stability using series compensation on	

7. Describe dependence of real and reactive power flow control in UPFC. [8] a) Write a comparison between IPFC and UPFC. b) [8]

IV B.Tech II Semester Regular Examinations, April/May - 2017 FACTS: FLEXIBLE ALTERNATING CURRENT TRANSMISSION SYSTEMS (Electrical and Electronics Engineering)

Time: 3 hours

Code No: **RT42023C**

Max. Marks: 70

Question paper consists of Part-A and Part-B Answer ALL sub questions from Part-A Answer any THREE questions from Part-B *****

PART-A (22 Marks)

l.	a)	Write the importance of controllable parameters in AC power flow systems.	[4]
	b)	Mention the various types of current source converters.	[4]
	c)	What is meant by controllable VAR generation?	[3]
	d)	Why static compensator not used as perfect voltage regulator?	[3]
	e)	Write the objectives of series compensation.	[4]
	f)	List out the technical benefits of UPFC.	[4]

<u>PART–B</u> (3x16 = 48 Marks)

2.	a)	Explain the dynamic stability considerations of an interconnected transmission	
		system.	[8]
	b)	Discuss the losses and speed of switching of high power devices.	[8]
		Xo	
3.	a)	Describe the voltage-sourced converter concept with necessary schematics.	[8]
	b)	Explain the square wave voltage harmonics for a single phase bridge converter.	[8]
4.	a)	Discuss the improvement of voltage stability using shunt compensation.	[8]
	b)	Write a comparison between thyristor controlled reactor and thyristor switched	
		reactor.	[8]
5	2)		
5.	a)	Write a comparison between STATCOM and SVC in the following	
5.	a)	(i) V-I characteristics (ii) transient stability.	[8]
5.	a) b)	(i) V-I characteristics (ii) transient stability.What is meant by power oscillation damping? Explain its functional control	[8]
5.	a) b)	(i) V-I characteristics (ii) transient stability.What is meant by power oscillation damping? Explain its functional control implementation.	[8] [8]
5.	a) b) a)	Write a comparison between STATCOM and SVC in the following(i) V-I characteristics (ii) transient stability.What is meant by power oscillation damping? Explain its functional control implementation.Explain the operation of basic GTO-controlled series capacitor.	[8] [8]
6.	 a) b) a) b) 	 Write a comparison between STATCOM and SVC in the following (i) V-I characteristics (ii) transient stability. What is meant by power oscillation damping? Explain its functional control implementation. Explain the operation of basic GTO-controlled series capacitor. Discuss the configuration and operation of TCSC. 	[8] [8] [8] [8]
6.	a) b) a) b)	 Write a comparison between STATCOM and SVC in the following (i) V-I characteristics (ii) transient stability. What is meant by power oscillation damping? Explain its functional control implementation. Explain the operation of basic GTO-controlled series capacitor. Discuss the configuration and operation of TCSC. 	[8] [8] [8] [8]
 6. 7. 	 a) b) a) b) a) 	 Write a comparison between STATCOM and SVC in the following (i) V-I characteristics (ii) transient stability. What is meant by power oscillation damping? Explain its functional control implementation. Explain the operation of basic GTO-controlled series capacitor. Discuss the configuration and operation of TCSC. Describe the basic operating principles and concepts of UPFC. 	[8] [8] [8] [8] [8]
 6. 7. 	 a) b) a) b) 	 Write a comparison between STATCOM and SVC in the following (i) V-I characteristics (ii) transient stability. What is meant by power oscillation damping? Explain its functional control implementation. Explain the operation of basic GTO-controlled series capacitor. Discuss the configuration and operation of TCSC. Describe the basic operating principles and concepts of UPFC. Explain the control structure of IPFC. 	 [8] [8] [8] [8] [8] [8] [8]

Time: 3 hours

FirstRank

Code No: **RT42023C**

Max. Marks: 70

Question paper consists of Part-A and Part-B Answer ALL sub questions from Part-A Answer any THREE questions from Part-B *****

PART-A (22 Marks)

1.	a)	What are the requirements of high speed power devices?	[4]
	b)	What is the principle of voltage source converter?	[4]
	c)	List out the requirements of shunt compensation.	[3]
	d)	Mention the various control approaches in static VAR generation.	[4]
	e)	Write the basic principle difference between series and shunt compensation.	[4]
	f)	Explain the any three applications of UPFC.	[3]

<u>**PART-B**</u> (3x16 = 48 Marks)

2.	a)	Discuss the technical benefits of FACTS technology.	[8]
	b)	Explain the power flow considerations of a transmission interconnected systems.	[8]
3.	a)	Describe the operation of three-phase full-wave bridge converter.	[8]
	b)	Distinguish between voltage source and current source converters.	[8]
4.	a)	Describe the basic thyristor switched capacitor and its operation.	[8]
	b)	Explain the power oscillation damping in shunt compensation.	[8]
5.	a)	Discuss the operation of STATCOM with a neat diagram and characteristics.	[8]
	b)	Write a short note on transient stability enhancement using STATCOM and SVC.	[8]
6.	a)	Enumerate the basic operating control schemes of TSSC and TCSC.	[8]
	b)	Discuss the effect of series capacitive compensation in transmission lines.	[8]
7.	a)	Describe the various transmission control capabilities of UPFC.	[8]
	b)	Explain the basic two-converter Interline Power Flow Controller scheme.	[8]
