Reg. No. :

Question Paper Code : 21042

DEGREE EXAMINATION, NOVEMBER/DECEMBER 2018,

First SemeSter.

Civil Engineering

PH 6151 — ENGINEERING PHYSICS — I

(Common to : branches)

(Regulations 2013)

Time : Three hours

Maximum 100 marks

Answer ALL questions.

1

PART A — (10 X 4 = 20 marks)

- 1. What are lattice parameters?
- 2. Draw the crystal planes with miller indices (101) and (100).
- 3. Define stress and strain with units.

. What are the modes of heat transfer?

- 5. Define COmpton shift.
- 6. Give the physical significance of the wave function.
- 7. How do you Classify the sound waves with frequency?
- 8. What is Echelon afect?'
- 9. What is the principle of laser?
- 10. A signal of 100 mW is launched into a fiber. The out coming signal from the other end is 50 mW. What is the loss in dB?

PART B — (5 x 16 = 80 marks)

11.	a) (i) Define Atomic, packing factor and derive it for face centered cubic structure.	
	(ii) Write short notes on Diamond and Graphite.	(8)
	Or	
	(b) (i) Calculate the interplanar distance for the Miller indi- simple cubic lattice with interatomic spacing equal to 4	ces (321) in .12A. (4)
	(ii) Explain the Czochralski method of crystal growth.	(12)
12.	(a) (i)5 How the temperature and impurity factors are after elasticity of the materials.	fecting the (4)
	(ii) Derive an expression for depression at the free end of due to load	a cantilever (12)
	Or	
	(b) Derive the equalion for heat conduction along an infinite l solve it for steady state condition.	long bar and (16)
13.	(a) Derive Planck's Black bOdy radiation formula . and dec displacement law and Rayleigh-Jean's law. '	luce Wien's • (16)
	Or (b) Solve the Schrodinger time independent wave' equation for one dimensional box and calculate the Eigen values and, Eig	a particle in, gen functions. • (16)
14.	(a) Derive Sabines theory to explain the growth of sound energy	y in a room. (16)
	(b) (i) Explain the acoustic grating method to determine the ultrasonic waves in liquid.	.velocity of (8)
	Explain A-scan technique in NDT to locate a defect in a	metal piece. (8)
15.	(a) Discuss the construction and working of a Nd: YAG laser and	its uses.(16)-
	Or	
	(b) (i) List out the advantages of fiber optics communication.	(8)
	(ii) • Write notes on fiber optic endoscopy.	(8)
