GUJARAT TECHNOLOGICAL UNIVERSITY MBA - SEMESTER 02 - EXAMINATION - SUMMER 2018

Subject Code: 820007 Date:28/05/2018

Subject Name: RESEARCH METHODOLOGY AND OPERATIONS

RESEARCH (RM&OR)

Time: 10:30 AM To 01:30 PM **Total Marks: 70**

Instructions:

- 1. Attempt all questions.
- 2. Make suitable assumptions wherever necessary.
- Figures to the right indicate full marks.
- **07** Explain in detail "Research Process" with example Q.1 (a)
- **07** What is Hypothesis? Explain Null and Alternative Hypothesis in detail. **(b)** 0.1
- Use Graphical method to solve following Linear Programming Problem: **Q.2** (a) **07**

Max.
$$Z = 2X_1 + 1.5X_2$$

STC $36X_1 + 24X_2 \le 576$
 $X_1 + X_2 \le 20$
 $X_1, X_2 \ge 0$

What is sampling? Explain any three non-probability sampling techniques in 07 Q. 2 **(b)** detail.

OR

- Explain "Survey technique" to collect primary data in detail. **(b)**
- Explain in detail "Type I and Type II errors" **Q.3** (a) 07
 - Write dual for the following: **(b)**

 $Max Z = 4X_1 + 5X_2$

STC
$$3X_1 + X_2 \le 15$$

 $X_1 + 2X_2 \le 10$
 $5X_1 + 2X_2 \le 20$

$$X_1, X_2 \ge 0$$

OR

- Write and explain components of "Research Report Writing" Q.3 (a)
- 07 07
 - In the modification of plant layout of a factory, four machines M1, M2, M3 and M4 **(b)** are to be installed. There are five places A, B, C, D and E available. Due to limited space, M2 cannot be placed at C and M3 cannot be placed at A. The cost of locating a machine at a place (in Rs. 100) is as follows. Find optimal assignment schedule.

	A	В	C	D	E
M1	9	11	15	10	11
M2	12	9		10	9
M3		11	14	11	7
M4	14	8	12	7	8
M5	0	0	0	0	0

Find Initial Feasible Solution (Total cost of transportation) for the following **Q.4** (a) **07** transportation problem using North-west Corner rule. The following figures indicate Cost of transportation (in Rs. per unit).

	W1	W2	W3	W4	Supply
F1	14	25	45	5	6
F2	65	25	35	55	8

(3.)	****	•	1.0	T 1 .	•	C	

(b) What is operations research? Explain the nature of operations research in detail.

OR

- Q.4 (a) What is integer programming? Explain types of integer programming in detail.
 - (b) Producer of two types of products found that the cost of product A is Rs. 3 per unit and that of product B is Rs. 4 per unit. It is found that product A needs 3 man hours and product B needs 2 man hours. There are total 150 man hours available with company. Also product A requires 1 Kg. of Raw material per unit and product B requires 2 Kg. of Raw material per unit. Assuming total 400 Kg. of Raw material available with company, formulate LPP.
- Q.5 (a) What is Monte Carlo simulation? Explain advantages and limitations of Monte Carlo simulations.
 - (b) Solve the following network and find out shortest path to reach from point "s" to point "t".

- Q.5 (a) What is qualitative and quantitative research design? Explain difference 07 between them.
 - (b) A travelling salesman has to visit 5 cities. He wants to start from city A, visit each city once and return back to city A. The travelling cost in Rs. thousand, as given under:

13	A	В	C	D	E
A	-	2	5	7	1
В	6	-	3	8	2
С	8	7	-	4	7
D	12	4	6	-	5
E	1	3	2	8	-
