- 4 Write about the long term applications of non-materials.
- OR
- 5 (a) Write a conversation between you and your friend exchanging views on the role of English for your career development.
- (b) Make notes for the following passage:
- The small village of Somnathpur contains an extraordinary temple, built around 1268 A.D. by the Hoyasalas of Karnataka-one of the most prolific temple builders. Belur and Halebid are among their better-known works. While these suffered during the invasions of the 14th century, the Somnathpur temple stands more or less intact in near-original condition. This small temple captivates with the beauty and vitality of its detailed sculpture, covering almost every inch of the walls, pillars, and even ceilings. It has three shikharas and stands on a star-shaped, raised platform with 24 edges. The outer walls have a profusion of detailed carvings: the entire surface run over by carved plaques of stone. There were vertical panels covered by exquisite figures of gods and goddesses with many incarnations being depicted. There were nymphs too, some carrying an ear of maize (a symbol of plenty and prosperity). The elaborate ornamentation, very characteristic of Hoyasala sculptures, was a remarkable feature. On closer look – and it is worth it – the series of friezes on the outer walls revealed intricately carved caparisoned elephants, charging horsemen, stylized flowers, warriors, musicians, crocodiles, and swans.

UNIT - IV

- 8 (a) When was the Hubble launched? What are the conditions under which the Hubble has to operate?
(b) Read the following passage and answer the questions that follow:
Until the 19th century, the main sources of information about ancient Egyptian medicine were writing from ancient Greeks and Romans. Homer c.800 BC remarked in the Odyssey. "Egyptians were skilled in medicine more than any other art". The Greek historian Herodotus visited Egypt around 440 BC and wrote of his observations. Pliny the elder also wrote favorably of them. Hippocrates, the "father of medicine", acknowledged the contribution of ancient Egyptian medicine to Greek medicine. In 1822, the translation of the Rosetta stone finally allowed the translation of ancient Egyptian writings, including many related to medical matters. The resultant interest in Egyptology in the 19th century led to the discovery of several sets of ancient medical documents, including papyruses dating back as far as 3000 BC.
- Question:
- (i) This selection is mainly about
(A) Ancient Egyptian medicine. (B) How we learned about ancient Egyptian medicine.
(C) Ancient Egyptian medicine and Greek medicine. (D) Ancient Egyptian papyruses.
