

Code No: 115AP

R13

JAWAHARLAL NEHRU TECHNOLOGICAL UNIVERSITY HYDERABAD

B. Tech III Year I Semester Examinations, November/December - 2016

COMPILER DESIGN

(Computer Science and Engineering)

Time: 3 hours

Max. Marks: 75

Note: This question paper contains two parts A and B.
Part A is compulsory which carries 25 marks. Answer all questions in Part A. Part B consists of 5 Units. Answer any one full question from each unit. Each question carries 10 marks and may have a, b, c as sub questions.

PART - A

(25 Marks)

1. Write a brief note on bootstrap process. [2]
 2. What are the differences between a compiler and an interpreter? [2]
 3. Give the specification of the YACC parser generator. [3]
 4. Construct the LR(0) items for the "dangling-else" grammar. [2]
 5. How to check structural equivalence of two type expressions? [3]
 6. Define and write the differences between synthesized attributes and inherited attributes. [2]
 7. Write a short note on Flow graph. [3]
 8. Write an algorithm for constructing a basic block. [2]
 9. Define various possible outputs of the code generator. [3]
 10. Construct DAG for the following basic block: [2]
- $T1 = A + B$
 $T2 = C + D$
 $T3 = E - T2$
 $T4 = T1 - T3$ [3]

PART - B

(50 Marks)

2. a) Explain various error recovery strategies in lexical analysis.
- b) Construct a Finite Automata and Scanning algorithm for recognizing identifiers, numerical constants in C language. [5+5]
3. OR
Explain the various phases of a compiler with an illustrative example. [10]
4. Construct the LR Parsing table for the following grammar [10]
 $E \rightarrow E + T \mid T$
 $T \rightarrow T * F \mid F$
 $F \rightarrow (E) \mid id$
5. OR
a) Write a YACC program that will take regular expression as input and produce its parse tree as output.
- b) Write an algorithm for computing LR(k) item-sets. [5+5]
6. a) Write an SDT to convert infix to postfix expression.
- b) Explain briefly about polymorphic functions. [5+5]
7. OR
Explain various storage allocation strategies with its merits and demerits. [10]
8. Discuss various techniques of function preserving transformations for code optimization. [10]
9. OR
Explain how data flow equations are set up and solved for improving code. [10]
10. Explain the following peephole optimization techniques [5+5]
 a) Elimination of Redundant Code
 b) Elimination of Unreachable Code.
11. OR
Explain in detail about machine dependent code optimization techniques with their drawbacks. [10]
