Subject Code: B13102/R13

I B. Pharmacy I Semester Regular/Supplementary Examinations Feb. - 2015
REMEDIAL MATHEMATICS-I

Time: 3 hours   **Max. Marks: 70**

Question Paper Consists of **Part-A** and **Part-B**
Answering the question in **Part-A** is Compulsory,
Three Questions should be answered from **Part-B**
*****

PART-A

1.(a) Find the no of permutations that can be made using the letters of the word 'ALGEBRA'.

(b) Simplify $\sin(45^0 + A)\sin(45^0 - A)$.

(c) Find the centroid if the triangle whose vertices are (3, 1), (-5, 2) and (-1, 6).

(d) Find $\displaystyle Lim_{x\to0} \frac{\tan(\sin x)}{x}$.

(e) Evaluate $\displaystyle \int \frac{\log x.\log(\log x)}{x}dx$.

(f) Solve $y' + 2xy = e^{-x^2}$.   [3+4+4+3+4+4]

PART–B

2.(a) The 4th term of a geometric progression exceeds the second term by 24 and the sum of the 2nd and 3rd term is 6. Find the progression.

(b) Find the value of $\tan 75^0 - \cot 75^0$.

                                                                          [8+8]

3.(a) Solve the system of equations $x + y + z = 8$; $2x + 3y + 2z = 19$ and $4x + 2y + 3z = 23$, using Crammer's rule

(b) The angle of elevation of the top of a tower from a point on the same level as the foot of the tower is 15^0. On moving 100 m towards the tower, the angle of elevation increases to 30^0. Find the height of the tower.

                                                                          [8+8]

4.(a) For what values of 'x', the area of the triangular region enclosed by the segments joining the points (3, 4), (x, -1) and (4, -6) will be 7.5 sq. units.

(b) If $f(x) = \begin{cases} 0, & when \ x^2 > 1 \\ 1, & when \ x^2 < 1 \\ \frac{1}{2}, & when \ x = 1 \end{cases}$. Find whether $f(x)$ is continuous at x = 1 and x = –1

                                                                          [8+8]

Page 1 of 2

Subject Code: B13102/R13

5.(a)　Find the equation of the straight line passing through (1, 1) and perpendicular to the line passing through (3, 5) and (–6, –2).

  (b)　Find the derivation of $\dfrac{e^x x^2}{\log x}$.

<div align="right">[8+8]</div>

6.(a)　Evaluate $\displaystyle\int_0^{\pi/2} \log(\tan x)\,dx$.

  (b)　Find the differential equation from the equation $y = Ax^3 + Bx^2$.

<div align="right">[8+8]</div>

7.(a)　Find the area lying between the curves $y = x^2$ and the straight lines y = 0, x = 1 and x = 2.

  (b)　Solve $\dfrac{dy}{dx} = \dfrac{x-y}{x+y}$.

<div align="right">[8+8]</div>
