

Code No: R161105

**R16****SET - 1****I B. Tech I Semester Regular/Supplementary Examinations, Oct/Nov - 2018****ENGINEERING CHEMISTRY**

(Com. to CE,ME,Aero E, Bio-Tech, Chem E,Min E, Metal E, PE,PChem E, Auto E)

Time: 3 hours

Max. Marks: 70

- Note: 1. Question Paper consists of two parts (**Part-A** and **Part-B**)  
2. Answering the question in **Part-A** is Compulsory  
3. Answer any **FOUR** Questions from **Part-B**
- ~~~~~

**PART -A**

1. a) Give reason why vulcanization is required for natural rubber. (2M)
- b) Define higher calorific value. (2M)
- c) What are the limitations of standard hydrogen electrode? (2M)
- d) What are nematic liquid crystals? (2M)
- e) What is hardness? Mention its types and units. (2M)
- f) What are refractories? (2M)
- g) Define cloud and pour point. (2M)

**PART -B**

2. a) Explain conducting polymers. (7M)
- b) Explain the advantages and limitations of plastics. (7M)
3. a) Explain fractional distillation of petroleum with a neat sketch. (7M)
- b) What is meant by knocking? Distinguish petrol knocking and diesel knocking. (7M)
4. a) Write notes on electroplating and tinning. (7M)
- b) Explain single electrode potential. (7M)
5. a) Discuss the characteristics and applications of superconductors. (7M)
- b) What are carbon nanotubes? Discuss single walled and multiwalled nanotubes. (7M)
6. a) Explain ion-exchange process for softening of hard water. (7M)
- b) Discuss about (7M)
  - (i) Reverse osmosis
  - (ii) Breakpoint chlorination
7. a) Explain setting and hardening of cement. (7M)
- b) Discuss hydrogen-oxygen fuel cells. (7M)

Code No: R161105

**R16****SET - 2****I B. Tech. I Semester Regular/Supplementary Examinations, Oct/Nov - 2018**  
**ENGINEERING CHEMISTRY**

(Com. to CE,ME,Aero E, Bio-Tech, Chem E,Min E, Metal E, PE,PChem E, Auto E)

Time: 3 hours

Max. Marks: 70

- Note: 1. Question Paper consists of two parts (**Part-A** and **Part-B**)  
2. Answering the question in **Part-A** is Compulsory  
3. Answer any **FOUR** Questions from **Part-B**
- ~~~~~

**PART -A**

1. a) How is Teflon prepared? (2M)
- b) Write the characteristics of rocket fuels. (2M)
- c) Explain the effect of temperature on corrosion. (2M)
- d) Write any four principles of green chemistry. (2M)
- e) What are scales and sludges? (2M)
- f) Explain the effect of sulphates on cement. (2M)
- g) Which of the following metals provide cathodic protection to iron: Al, Cu, Zn, Cr, and Ni? State the reason. (2M)

**PART -B**

2. a) Discuss the preparation and applications of polyurethanes. (7M)
- b) Explain suspension and emulsion polymerization. (7M)
3. a) Explain Orsat analysis of flue gases. (7M)
- b) Discuss moving bed catalytic cracking method for manufacture of gasoline. (7M)
4. a) Discuss bimetallic and differential aeration corrosion. (7M)
- b) Discuss electro chemical series and uses of this series. (7M)
5. a) Explain the characterization methods of nanomaterials. (7M)
- b) Write the applications of liquid crystals. (7M)
6. a) Discuss zeolite process for softening of hard water. (7M)
- b) A water sample on analysis contains 10 mg/L  $\text{Ca}(\text{HCO}_3)_2$ , 25 mg/L  $\text{Mg}(\text{HCO}_3)_2$ , 12 mg/L  $\text{CaSO}_4$ , 15 mg/L  $\text{MgSO}_4$ . Calculate temporary, permanent and total hardness of water. (7M)
7. a) What are the characteristics of refractory? Discuss the failure of refractories. (7M)
- b) Define the following terms: (7M)
  - (i) Flash and fire point
  - (ii) Saponification value
  - (iii) Oiliness

Code No: R161105

**R16****SET - 3****I B.Tech. I Semester Regular/Supplementary Examinations, Oct/Nov - 2018****ENGINEERING CHEMISTRY**

(Com. to CE,ME,Aero E, Bio-Tech, Chem E,Min E, Metal E, PE,PChem E, Auto E)

Time: 3 hours

Max. Marks: 70

Note: 1. Question Paper consists of two parts (**Part-A** and **Part-B**)2. Answering the question in **Part-A** is Compulsory3. Answer any **FOUR** Questions from **Part-B****PART -A**

1. a) Explain the need for the use of biodegradable polymers. Give examples. (2M)
- b) Explain the role of antiknocking agents in engines. Give examples. (2M)
- c) Define electroplating. (2M)
- d) What are type -I superconductors? (2M)
- e) Explain why concentration of hardness of water is expressed in terms of calcium carbonate ( $\text{CaCO}_3$ ) equivalence. (2M)
- f) What is meant by aniline point? (2M)
- g) What is the function of gypsum in cement? (2M)

**PART -B**

2. a) Explain any two moulding techniques of plastics. (7M)
- b) Discuss the preparation, applications of Thiokol. (7M)
3. a) Explain with a neat sketch the working of bomb calorimeter. (7M)
- b) Write notes (7M)
  - (i) Biodiesel
  - (ii) Natural gas.
4. a) Explain the factors affecting corrosion based on nature of metal. (7M)
- b) Explain about (7M)
  - (i) Galvanic cell
  - (ii) Zinc-air batteries
5. a) Explain supercritical method of green synthesis. (7M)
- b) Discuss the applications of carbon nanotubes. (7M)
6. a) Explain priming and foaming. How can it be reduced? (5M)
- b) Discuss internal treatment methods for purification of water. (9M)
7. a) Explain refractoriness under load and refractoriness. (7M)
- b) Discuss thermal insulators and their applications. (7M)

Code No: R161105

**R16****SET - 4****I B.Tech. I Semester Regular/Supplementary Examinations, Oct/Nov - 2018****ENGINEERING CHEMISTRY**

(Com. to CE,ME,Aero E, Bio-Tech, Chem E,Min E, Metal E, PE,PCHEM E, Auto E)

Time: 3 hours

Max. Marks: 70

- Note: 1. Question Paper consists of two parts (**Part-A** and **Part-B**)  
2. Answering the question in **Part-A** is Compulsory  
3. Answer any **FOUR** Questions from **Part-B**
- ~~~~~

**PART -A**

1. a) What is the role of stabilizers in compounding of rubber? (2M)
- b) What is power alcohol? (2M)
- c) Explain water line corrosion. (2M)
- d) How are fullerenes prepared? (2M)
- e) What is meant by phosphate conditioning? (2M)
- f) What are acidic and basic refractories? Give examples (2M)
- g) Explain why small anodic area causes intense corrosion. (2M)

**PART -B**

2. a) Discuss the physical and mechanical properties of polymers. (7M)
- b) Write the engineering applications of plastics. (7M)
3. a) What are fuels? Discuss the classification of fuels with examples for each. (7M)
- b) Explain ultimate analysis of coal. (7M)
4. a) Distinguish anodic and cathodic coatings. (7M)
- b) Explain reversible and irreversible cells with examples. (7M)
5. a) Discuss the aqueous phase method of green synthesis. (7M)
- b) Explain the principles of green chemistry. (7M)
6. a) What are boiler troubles? Explain boiler corrosion. How can it be minimized? (7M)
- b) Explain how hardness and alkalinity can be determined. (7M)
7. a) Explain wet process for manufacture of cement. (7M)
- b) Explain the mechanism of fluid lubrication. (7M)
