

Code No: **RT41355**

Set No. 1

IV B.Tech. I Semester Regular/Supplementary Examinations, Oct/Nov - 2018 SEED PROCESING AND STORAGE ENGINEERING

R13

(Agriculture Engineering)

Time: 3 hours Max. Marks: 70

Question paper consists of Part-A and Part-B Answer ALL sub questions from Part-A Answer any THREE questions from Part-B *****

PART- A(22Marks)

		1 AK1 - A(22Walks)	
1	a)	Explain the typical drying curves with neat sketches.	[4]
	b)	Explain why convection drying is considered as the most popular	
	,	method of grain drying.	[4]
	c)	List out the segments of total refrigeration load.	[4]
	d)	List out and briefly explain destructive agents of grains in storage.	[4]
	e)	Explain bunker storage with any diagram.	[3]
	f)	List out the limitations of pneumatic conveyer.	[3]
	1)	List out the initiations of pheumatic conveyer.	IJ
		PART -B(3 X 16=48Marks)	
2	a)	Give a detailed account on any two EMC models. If 1000 kg of paddy	
_	,	seed at 25 % moisture content on wet basis is dried to 14 % moisture	
		content for storage, calculate the amount of moisture removed in drying	
		on wet and dry basis.	[8]
	b)	List out the usefulness of EMC and derive henderson's equation.	[8]
	0)	Eist out the ascramess of Eiste and defit inchesison's equation.	[o]
3	a)	Give a detailed account on continuous flowing non mixing type of grain	
3	u)	drier with a labeled diagram.	[8]
	b)	Explain the construction and operation of rotary drier.	[8]
	U)	Explain the construction and operation of lotary drief.	[O]
4	a)	List out different types of spoilage that occur in storage grains.	[8]
	b)	List out the important changes taking place in grain during storage.	[8]
	U)	List out the important changes taking place in grain during storage.	[0]
5	a)	Briefly explain various kinds of losses caused due to insect pest	
	/	infestation on stored food grains.	[8]
	b)	What are the different methods of estimation of damage available to	[~]
	0)	assess damage caused to food grains?	[8]
		assess and the result of the second s	[~]
6	a)	Give a detailed on the following bulk storage structures	
Ü	α,	(i) Pusa bin (ii) Brick and cement bin (iii) Vertical stylos	[8]
	b)	Give a detailed account on traditional storage structures.	[8]
	0)	Give a detailed account on traditional storage structures.	[o]
7	a)	List out the principles to be considered before selecting a conveying	
	,	system and give a detailed account on belt conveyers idlers.	[8]
	b)	Explain how grains are stored under controlled atmospheric conditions.	[8]
	0,		r~1
