For each of the three scenarios below categorize the demand for bulk breaking, spatial convenience, waiting/ delivery time, and assortment/ variety as high, medium, or low. In each case, explain your answers and describe a marketing channel that would beat the target end-user’s demands for service outputs.
 - a. A women in an emerging market country of South East Asia wishes to buy some cosmetics for herself. She has never done so before and is not entirely sure of the occasions on which she will wear the cosmetics. She does not live near a bit city. She is too poor but has a bit of extra money for a small luxury.
 - b. A manufacturer uses a particular industrial chemical in one of its large scale production process and needs to buy more of this chemical. The rest of the raw materials for its plant operations are delivered in a just-in-time fashion.
 - c. Before you visit certain parts of the world, you are required to get a yellow fever vaccine. Many travellers let this slip until the last minute, forgetting that it is

advisable (or avoiding unpleasant shot as long as possible). But they definitely realize they need the shot, and they do not to have a cancel trip at the last minute because they did not get it. They often find themselves making a long rip to regional medical centre because they did not plan ahead.
