Exercise price	Rs. 70	80	75
Time to expiration	3 months	3 months	3 months
Risk – free return	12% p.a.	12% p.a.	12% p.a.
Expected dividend	0	0	0
Stock return	60%	60%	60%
Calculate the option Value for ABC			

8. Case Study:

Hyundai motors exports cars to Germany, and every three month, it would receive EUR 500,000 from car shipments. On March 1, the exchange rate between the Indian rupee and the euro is EUR 1= INR 70.7242. The interest rate in Germany is 6% per annum, while the interest rate in India is 9% per annum. Hyundai wants to hedge its euro receipt through forward contracts for the next 6 months.

Questions:

- a) What type of hedging activity would be suitable for Hyundai?
- b) What would be the amount in Indian rupees that Hyundai will receive after 90 days and after 180 days if it enters into a 90 – day and 180 – day forward contract, respectively?
