7. a Calculate the expected return and standard deviation of returns for a stock having the following probability distribution of returns. 6M

Possible returns(in percentage)	Probability of occurrence
-20	0.05
-10	0.10
0	0.10
10	0.15
20	0.25
25	0.20
30	0.15

- b What do you mean by risk? Explain different types of risk. 6M
8. Sofitech Ltd is a well known company in the IT industry. Based on the monthly data for the last 5 years its beta appears equal to 1.65. During this period the company has deployed an average debt equity ratio of around 40% in its capital structure. Looking at the challenges being posed by the new patent regime, the company has realized the need for making more investment in research and development activities. For meeting its funding requirement, the company is planning to raise additional funds from the markets. The CFO of the company is exploring the option of raising the debt level to 60%. However he is concerned that a raising additional debt may increase the risk proposition of the company, as measured by beta. Calculate: 12M
- a) The beta level of Sofitech at 50%.
- b) The beta level of Sofitech at 60%.
- c) Comment upon the increase in the risk level.
