## First Professional MBBS Degree Supplementary Examinations February 2017

## **BIOCHEMISTRY- PAPER I**

BIOCHEMISTRY- PAPER I	
Time: 3 Hours <ul> <li>Answer all questions</li> <li>Draw diagrams wherever necessary</li> </ul>	Total Marks: 50
<ul> <li>Essay</li> <li>1. Explain the oxidation of palmitate in mitochondria. Describe how the pregulated. Mention the number of high energy phosphate bonds generation</li> </ul>	
<ul> <li>Short essays</li> <li>2. Explain the digestion and absorption of proteins</li> <li>3. What are enzymes. Explain briefly the factors affecting the velocity of catalyzed reactions.</li> </ul>	<b>(2x5=10)</b> enzyme
<ul> <li>Short notes</li> <li>4. Mucopolysaccharides</li> <li>5. Lipoproteins</li> <li>6. Phenylketonuria</li> <li>7. Glucose transporters</li> <li>8. Trans methylation reactions</li> <li>Answer briefly</li> <li>9. Uncouplers</li> <li>10. Glutathione</li> <li>11. Albinism</li> <li>12. Galactosemia</li> </ul>	(5x3=15) (5x2=10)
<ul> <li>9. Uncouplers</li> <li>10. Glutathione</li> <li>11. Albinism</li> <li>12. Galactosemia</li> <li>13. Cori's cycle</li> </ul>	( <b>)</b>
Give precise answers: 14. Name the substrates for gluconeogenesis 15. Normal blood level of urea and glucose 16. Name the important compounds formed from glycine 17. Therapeutic uses of enzymes 18. Benedict's test	(5x1=5)
