

R09**Code No: D4902, D6402****JAWAHARLAL NEHRU TECHNOLOGICAL UNIVERSITY HYDERABAD****M.Tech II - Semester Examinations, March/April 2011****ADVANCED POWER SYSTEM PROTECTION****(COMMON TO ELECTRICAL POWER ENGINEERING, POWER ENGINEERING & ENERGY SYSTEMS)****Time: 3hours****Max. Marks: 60**

Answer any five questions
All questions carry equal marks

- - -

1. Write short notes on the following:
 - a) Quadrilateral Relay.
 - b) Reactance Relay. [6+6]
2. a) Explain the principle of operation of distance relays and discuss the effect of power swing and fault impedance on distance relay.
 b) Explain the working of a MHO relay. [6+6]
3. a) What are the merits and demerits of a Static relay over electromechanical relay?
 b) Draw the block diagram of Static relay and explain various functional blocks with individual circuits. [6+6]
4. a) Draw a schematic diagram of Transley scheme and explain its principle of operation.
 b) Explain about phase comparison carrier current protection with a neat sketch. [6+6]
5. a) Explain the working of A/D converter.
 b) Write a brief note on rationalized HAAR transform techniques. [6+6]
6. a) Obtain generalized equations for Distance relays and Offset MHO relays.
 b) Explain the principle of operation of Microprocessor based Reactance relay with a suitable diagram. [6+6]
7. a) Discuss the advantages and disadvantages of Static relays as protective devices.
 b) Obtain the time current characteristic of Static relay. [6+6]
8. a) Give the merits of distance protection compared to over current protection for protection of transmission lines.
 b) Discuss how to realize different conic characteristics of Distance relays with a neat diagram. [6+6]
