JAWAHARLAL NEHRU TECHNOLOGICAL UNIVERSITY HYDERABAD
M.Tech I Semester Examinations March/April-2011
AIR TRANSPORTATION SYSTEMS
(AEROSPACE ENGINEERING)

Time: 3hours   **Max.Marks:60**

Answer any five questions
All questions carry equal marks

- - -

1.   Discuss through a diagram the series of traffic management phases that an aircraft is subjected to and how they help in making an assessment of Air Traffic Management System (ATM).   [12]

2.   Describe with a test case the types of disruptions that affect the air carriers.   [12]

3.   Explain the ATM Interaction Architecture stating assumptions involved.   [12]

4.   Describe the modeling aspects of departure and arrival processes at airports using queuing theory.   [12]

5.   Discuss with the help of diagrams the safety feedback based ATM design and ATM safety iceberg used in accident risk assessment for advance air traffic management.   [12]

6.   Explain why humans are necessary in Air Traffic Management.   [12]

7.   What are the tools used for the assessment of the wake vortex induced accident and incident risks? Discuss flight path evolution model.   [12]

8.   Describe the geometric approaches used for conflict prediction of aircraft trajectories in Air Traffic Management and discuss their limitations.   [12]
