R09

Code No: C5602

JAWAHARLAL NEHRU TECHNOLOGICAL UNIVERSITY HYDERABAD
M.Tech I - Semester Examinations, March 2011
DIELECTRIC AND INSULATION ENGINEERING
(POWER SYSTEMS HIGH VOLTAGE)

Time: 3hours   Max. Marks: 60

Answer any five questions
All questions carry equal marks
- - -

1.a) Explain the concept of complex permittivity.
  b) What is polarization? Explain the concept of relative permittivity.   [12]

2. What is the basis of classifying insulating materials? Explain about different classes, their ranges limitations and applications.   [12]

3.a) Describe various applications of SF6 as gaseous insulating material.
  b) Which factors make SF6 a very good gaseous insulating material?   [12]

4. Explain the "streamer theory" of break down of gases.   [12]

5. Derive Paschens law. What are its applications?   [12]

6.a) Describe the phenomenon of break down of gases in non uniform electric fields.
  b) Explain the phenomenon of corona.   [12]

7. Explain the various theories of break down in commercial insulating liquids.
      [12]

8. Explain the phenomenon of break down due to treeing and tracking. How can they be prevented?   [12]
