

**R09**

**Code No: D6407**

**JAWAHARLAL NEHRU TECHNOLOGICAL UNIVERSITY HYDERABAD**

**M.Tech II - Semester Examinations, March/April 2011**

**ENERGY MANAGEMENT AND THERMAL ENERGY CONVERSION  
(POWER ENGINEERING AND ENERGY SYSTEMS)**

**Time: 3hours**

**Max. Marks: 60**

**Answer any five questions  
All questions carry equal marks**

- - -

1. a) Explain the necessary steps and general principles of energy management program.  
b) Explain the functions and language of energy manager. [6+6]
2. a) Define energy audit and explain the steps in energy auditing and surveying.  
b) Explain the significance of Pie charts, Sankey diagrams and load profiles in conducting energy audit. [6+6]
3. a) List out the technologies for energy conservation.  
b) Explain the significance of critical assessment of energy usage in the conservation of energy. [6+6]
4. a) Describe Indian Electricity Act.  
b) Explain the rules for conservation of energy and materials. [6+6]
5. a) Explain the guidelines to identify waste heat and feasibility study of waste heat recovery.  
b) Explain the working of shell and tube heat exchanger with heat sketch. [6+6]
6. a) Derive the expression for LMTD of a counter flow heat exchanger.  
b) Explain the working of liquid -to- gas heat exchanger with heat sketch. [6+6]
7. a) Explain the working of heat pump with heat sketch.  
b) Derive the expression for effectiveness of a cross flow heat exchanger in terms of NTU. [6+6]
8. a) Explain the steps in energy audit of a Manufacturing Industry.  
b) Explain the working of Incinerator with neat sketch. [6+6]
