

Max. Marks: 60

## Code No: C8004 JAWAHARLAL NEHRU TECHNOLOGICAL UNIVERSITY HYDERABAD M.Tech I Semester Examinations, April 2011 INDUSTRIAL ELECTRICAL & ELECTRONICS (MECHATRONICS)

## Time: 3hours

## Answer any five questions All questions carry equal marks

- 1) a. Draw the characteristics curves of DC shunt and series motors. Use these curves to explain the applications for which these motors are used.
  - b. Write the principle of operation of induction generator? [6+6]
- 2) a. With the help of a neat sketch explain the construction and working principle of switched reluctance motor.
  - b. What do you mean by doubly fed induction machine and explain in what way it is useful in the operation of power system network? [6+6]
- 3) a. Explain the construction and working principle of linear synchronous machines.
  - b. Mention the applications of
    - i) PMDC machines
    - ii) PMSM machines
    - iii) Write the advantages and disadvantages of linear induction motor? [12]
- 4) a. Draw output and transfer characteristics of common emitter NPN transistor.
  - b. Explain the principle of operation of UJT.
  - c. Write the applications of high speed detectors and opto interrupter devices. [12]
- 5) a. Calculate the Z-transform of the system having transfer function 1/(1+2s) subjected to a step input sampled at 3Hz.
  - b. Explain the structure of a computer controlled system.
  - c. Write the merits of a digital controller over the analog controller. [12]
- 6) a. A220V DC shu8nt motor drawn no-load armature current of 2.5A when running at 1400rpm.Determine its speed when taking an armature current of 60A, if armature reaction weakens the flux by 3%
  - b. Explain any two starting methods of induction motors. [6+6]
- 7) a. Explain the construction and working principle of brushless DC machineb. Discuss briefly about
  - i) LOR
  - ii) LED
  - iii) LCD
  - iii) Plasma displays
- 8) Write short notes on
  - a. Programmable logic devices.
  - b. Opto electronic devices.
  - c. Special operational amplifiers.
