

R09

Code No: C0705**JAWAHARLAL NEHRU TECHNOLOGICAL UNIVERSITY HYDERABAD****M.Tech I - Semester Examinations, March/April-2011****REACTIVE POWER COMPENSATION AND MANAGEMENT****(ELECTRICAL POWER SYSTEMS)****Time: 3hours****Max. Marks: 60**

Answer any five questions
All questions carry equal marks

- - -

1. Explain how a Load Compensator works as a voltage regulator. [12]
2. How power factor correction and voltage regulation can be achieved by means of compensation in 1-phase systems. [12]
3. Explain briefly the following
 - a) Virtual- Z_0 (Surge impedance compensation)
 - b) Virtual- θ (Line-length compensation)
 - c) Compensation by "Sectioning". [12]
4. Explain uniformly distributed fixed compensation in transmission lines and how it effects the
 - i) voltage control ii) Line-charge reactive power iii) Maximum power of the line? [12]
5. Explain how shunt compensation is obtained by means of Mid-point shunt reactor or capacitor in transmission lines. [12]
6. a) Define Reactive Power Management.
 b) Explain how Reactive Power Management or Planning is obtained by means of mathematical modeling. [12]
7. Explain how a user side reactive power management is obtained by means of capacitors. [12]
8. Write short notes on:
 - a) Explain the different types of Power Tariffs.
 - b) Explain the load patterns in demand side management.
 - c) Explain the advantages and disadvantages of Flicker compensation techniques.
 - d) TCR-FC (Thyristor Controlled Reactor with Fixed Capacitor) in transient state reactive power compensation. [12]
